

FREE INVASIVE PLANT TRAINING WORKSHOP!

Tuesday, March 30, 2010

4-6pm, Rossland Library

Join the province-wide "Spotter's Network" team and learn how to identify and report invasive plants on your property and in your community. Invasive plants are spreading rapidly across BC, impacting the environment, economy, and in some cases, human health and safety.

We need your help to detect these "unwanted" invaders and prevent their further establishment. Join us for a 1-1.5 hour training workshop hosted by the Friends of the Rossland Range from 4:00-6:00pm, Tuesday March, 30th at the Rossland Public Library.

At this special workshop, which was developed by the Invasive Plant Council of BC, participants will gain knowledge and understanding of invasive plants, how they are impacting communities in BC, and practical tools to report them.

Join us and become a "Spotter" for your region!

For more information **and to register**, contact Jennifer at the Central Kootenay Invasive Plant Committee at (250)362-9646. Together we can stop the spread!

(Location is subject to change based on attendance, so please be sure to register! Thank you!)
